

Welcome at Mid Wife Amsterdam of the Geboortecentrum. In the Geboortecentrum we believe in full care and support voor new and young parents.

In this way we have an unique concept in one street with an [obstetric practice](#), [a Birth - Maternity Hotel](#), [Course Centre](#) (also in English), [Maternity](#)

[Care Centre](#) and [the Clinic](#). Everything you need during your pregnancy, child birth and young parenthood. We are located in a very central place

just behind the Leidseplein and we have an extra location in South at the Stadionweg. Would you like more info or a personal session? Click the

button [here](#) or call [020-6831640](tel:020-6831640)

The Geboortecentrum exists since 1994 and is because of this the oldest and best known obstetric practice in Amsterdam en surroundings. Because

of this we are often asked for information and comments on pregnancy and child birth by various people and media. One day Tamani Zamani (Mid

Wife) was asked by de Telegraaf (Dutch News Paper) if they could spend a day with her to see how the life of a Mid Wife is:

## Mid Wife Amsterdam - Freedom of Choice

You and your pregnancy are our central focus point. We believe in the power of women and the proces of childbirth. Every woman is different and together we make a plan. For us it is very important that every woman feels at home with her own vision and demands for the process.

## **Mid wife Amsterdam - het Geboortehotel**

There are many documentaries about the Geboortecentrum in the media. Underneath you find two. One is with two dutch presenters Dennis and

Valerio from BNN.

The other one is with English Artist Peter Andre for Itv. Both are filmed in the Geboortehotel.
